## DETAILED ACTION

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, 21, 22, 24, 25-27, 28-31 drawn to a system, method or apparatus for providing information in incomplete parts and recombining the parts to form complete information, comprising a terminal device and an information administration device, classified in class 715, subclass 748.
- II. Claim 19, drawn to an information providing apparatus, classified in class 709 subclass 203.
- III. Claim 20, drawn to a terminal device, classified in class 709, subclass 203.
- IV. Claim 23, drawn to a data reconstruction method, classified in class 715 subclass 748.

The inventions are distinct, each from the other because of the following reasons:

Inventions II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility as a web server. Subcombination III has separate utility such as a terminal device used for other applications, such as banking or gaming.

Art Unit: 3694

Subcombination IV has separate utility as a security method for protecting parts of files.

See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ann Loftus whose telephone number is 571-272-7342.

The examiner can normally be reached on M-F 8-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
